**HELD AT THE RANCH, SOUTH OF ROCK FALLS, ILLINOIS**

**The Sandrock Family**

**Sauk Valley Crew**  
 Mark McDonnell, Matt Sandrock, Jim Naftzger,  
 Connor Sandrock, Ben Sandrock

Dear Angus Friends,

Welcome to the 2026 Sauk Valley Angus Sale and thank you for your consideration! We feel very blessed to be afforded the opportunity to follow our dreams raising Angus cattle. It is our honor and privilege to share our genetics with our friends. The confidence and relationships that we have built with our customers over the past 80 years are the backbone of our success. Now, more than ever, an investment in SVA genetics will pay great dividends down the road as the beef industry continues to post record prices.

The bulls in this offering are stacked with performance and power. Growth, maternal, carcass, performance, powerful phenotype... It's all here. Whatever your breeding goals are, we have bulls that will take you there. These bulls and females are from the heart of the herd and certainly possess all of the tools that will allow you to fully capitalize on this tremendous cattle market. We are as proud of these cattle and as confident in their abilities as any set that we have ever offered; they are bred with your bottom line in mind!

**Pyszka and Sons Cattle Operation family**

Our NWSS Pen Bulls were met with tremendous enthusiasm and we would like to thank all of those who took time to stop by to see them in Denver. Our spring bulls weighed nearly 1350 and were a crowd favorite. The fall bulls were the Champion Yearling Pen, winning their division. These young herd sires have a world of potential and are a true testament to the genetics we have been utilizing. They have been developed on a high roughage ration and are ready to sire powerful sets of stout calves at their new homes! An exceptional set of productive young Angus females round out what is truly our best sale offering to date. The cattle are 100% guaranteed and we offer a \$50/head discount if you take them with you on sale day.

The friendships that we have formed with our cattle customers and cooperators over the years are invaluable – the people make the difference. We would like to thank our friends the Pyszka and Hackett families for their participation in the event. Be sure to mark your calendars for March 28th and join us early to view the cattle and have lunch. If there is anything that we can do to assist you in any way, please don't hesitate to contact us!

Thanks Again,  
 Ben Sandrock

# ANNUAL BULL AND FEMALE SALE

Saturday Noon (CDT) March 28, 2026  
Held At The Ranch, South of Rock Falls, Illinois

**SALE LOCATION:**

8681 Hickory Hills Rd, Rock Falls, IL 61071  
Sauk Valley Angus is located five miles south of Rock Falls on Route 40, 11/2 miles west on Gaulrapp Road. Watch for signs.

**MOTEL HEADQUARTERS:**

Country Inn & Suites, 2106 S 1st Avenue, Rock Falls, IL (815) 625-3200

**TRUCKING:**

Truckers believed to be reliable will be available to assist you in shipping your purchase.

**HERD HEALTH:**

All cattle will be accompanied by proper health certificates for immediate shipment.

**TERMS AND CONDITIONS:**

Terms of the sale are cash or check on sale day or payment wired on the next business day. Cattle will sell under the suggested Terms and Conditions of the American Angus Association ([http://www.angus.org/Pub/suggested\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggested_sale_terms.pdf)).

**RETAINED OWNERSHIP:**

Sauk Valley Angus will retain a one-third semen interest in every bull selling. The buyer will receive 100% possession and full salvage value.

**LIABILITY:**

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety or for the behavior of the animals. The owners, sale management firm, and the sale staff assume no liability for property loss or any accident that may occur.

**LIVESTOCK MORTALITY INSURANCE:**

To properly insure your investment, James F. Bessler, Inc., (815) 762-2641 and/or Ag Authority (309) 838-4929 will be available to assist you with mortality insurance coverage.

**SUPPLEMENTAL INFORMATION:**

A supplemental sheet will be available sale day with complete and up-to-date calving information. Announcements from auction block regarding the cattle selling in this sale take precedence over information listed in this catalog.

Up-to-date genetic recessive status can be viewed online at [www.angus.org](http://www.angus.org).

**FOOD AND REFRESHMENTS:** Complimentary lunch sale day.

AM EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. *References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.*

## COMMENTS FROM OUR SALE MANAGERS:

### *The Best Offering Ever From Sauk Valley!*

*Plan now to be on hand Saturday, March 28, 2026 for the Sauk Valley Angus Annual Bull and Female Sale at the farm near Rock Falls, Illinois. Selling will be 50 powerful spring and fall yearling bulls along with 15 females either with calves at side or heavy in calf. Featured will be the 2026 National Western Champion Yearling Pen of Bulls along with the 2026 Spring Pen of Bulls, both exhibited by Sauk Valley. Represented throughout our breed leading genetics from the time-tested program.*

*It is certainly a pleasure and privilege to work with the entire Sandrock and King families in the presentation of this important annual production sale. Make plans now to be part of it.*

*Please don't hesitate to call on us at American Angus Hall of Fame if we can be of assistance with your selection decisions. We are here to serve.*

A young cow by SVA Lincoln 1026 from a dam with a progeny weaning ratio of 116 and a progeny yearling ratio of 111 on two calves.

A maternal sister weaned her first calf with a ratio of 108.

Bred to calve March 22, 2026 to SVA LINCOLN 1026. Examined safe.

### SELLING BUYERS CHOICE OF LOT 69A OR 69B.

Championship genetics from a donor who was a popular show winner for Sophia Pyszka.

A fourth embryo will be included in lieu of a guarantee.

Call Mike Pyszka with any questions at 815-488-3106.

## AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

### PRODUCTION EPDS

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

### MATERNAL EPDS

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

### CARCASS EPDS

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

### \$VALUE INDEXES

**\$Value indexes**, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**Beef Value (\$B)**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
